Streptavidin – agarose resin

Description

Streptavidin (St. avidinii) immobilized on cross-linked CNBr-activated 4% agarose (50% slurry)

Catalog Number 262

Amount 1 ml

Format

50% slurry (2.0 ml), gel (1.0 ml) in 0.2 M NaCl, 0.1 M Na-borate, 0.005 M Na-azide, pH 8.0

Ligand

Streptomyces avidinii

Matrix

4% cross-linked agarose

Binding Capacity

6 mg of biotinylated IgG per 1 ml of packed gel

Applications

Irreversible binding of biotinylated proteins

Storage

Shipping at ambient temperature. Storage at +4°C for 12 months. Do not freeze

RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC, DRUG OR
HOUSEHOLD USE
