

Monoclonal mouse antibody anti-human IgA, FITC clone BFG-267

Description

Monoclonal mouse (murine) antibody (IgG1 fraction) anti-human IgA, clone BFG-267, FITC conjugated

Catalog Number 807

Amount 1.2 mg (1 ml)

Specificity

Specific against human IgA, α -chain. No reactivity to human IgE, IgG, IgM or other human plasma proteins.

Preparation

Precipitation by sodium sulphate and anion-exchange chromatography (DEAE-cellulose) with gradient elution

Format

Solution containing antibody 1.2 mg/ml in buffer (0.05 M sodium phosphate, 0.1 M NaCl, 50% glycerol, 5 mg/ml BSA)

Applications and recommended dilutions

ELISA (x1000), Immunohistology (x40)

Storage

Shipping at ambient temperature. Storage 2 years at -20°C or lower.

RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC, DRUG OR HOUSEHOLD USE
